

INSTALLATION

To install the SX200/400 or SX-600 simply connect coaxial cable directed to the antenna connector marked "ANT", and The cable coming from the transmitter or from the linear amplifier to the connector marked "TX".
SX-200/400 or SX-600 is ready to operate.

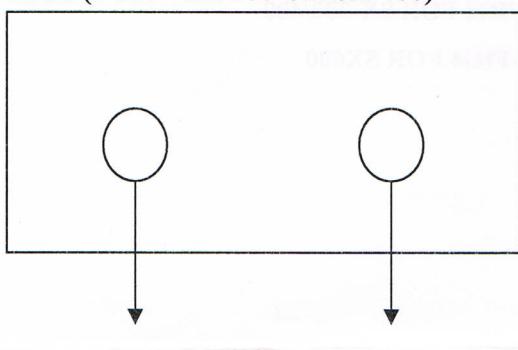

POWER MEASUREMENTS

- 1 Select the RANGE (3) switch on the end-scale position value as to the power of the unit
- 2 Select the FUNCTION (4) switch in the power position
- 3 Select the POWER switch the FWD position to measure the direct power (from the radio to antenna)
or REF position to measure the reflected power (from antenna to the radio)
- 4 Select the power value can be read on the corresponding scale.

SWR MEASUREMENTS

- 1 Select the RANGE (3) switch on the end-scale position value as to the power of the unit.
- 2 Select the FUNCTION (4) switch in the CAL position.
- 3 Let the radio transmit and adjust the instrument by turning the CAL knob, position the end-scale index in the CAL position.
- 4 Select the FUNCTION (4) switch in the SWR position
- 5 Read the SWR value in the above scale.
